Industrial Plants

1. The Zavod Georgi Dimitrov, formerly Veriga, is located on the eastern side of the Burgas-Malko Turnovo highway in the southwestern district known as Pyasetsite Kwartal (the Sands Quarter), approximately two kilometers from the center of Burgas. This plant manufactures horse-shoes, fence wire, nails, pails, both wood-burning and coal-burning stoves, and space heaters, and repairs farm machinery. The factory is made up of four 1-story brick workshops, 80 or 100 by 200 meters in size and with very few windows, plus a 2-story brick dormitory, 50 by 80 meters. One of the buildings was constructed in 1940 and the others since that date. The factory covers an area 400 by 800 meters and is enclosed by a barbed-wire fence with only one entrance. The labor force of the plant consists of approximately 700 persons who work in three shifts. [redacted] See Figure No. 1, Appendix A. 50X1-HUM
2. The Gocho Ivanov lumber mill, located about 600 meters south of the Zavod Georgi Dimitrov on the eastern side of the Burgas-Malko Turnovo highway, manufactures wooden barrels and reworks lumber logs into all types of construction timber for hardwood flooring and cabinet work. The mill consists of two wooden sheds, each surrounded with one brick wall; one of the sheds is 80 by 200 meters in size and the other, 100 by 400 meters. There is also an open-air storage area behind the smaller shed for curing green wood. The factory area is approximately 600 by 1,000 meters in size and is not fenced. [redacted] See Figure No. 2, Appendix A. 50X1-HUM

3. The Kambana soap factory, located on the western side of the Burgas-Sredets highway, approximately three kilometers west of Burgas, is the largest manufacturing plant of oleo and all types of soap in Burgas. The factory consists of three 1-story brick buildings, 60 by 100 to 150 meters in size, and one 1-story brick building, 60 by 60 meters. The factory area is approximately 500 by 1,000 meters in size, entirely enclosed by a brick wall 150 centimeters high, containing only one entrance which faces the highway. The labor force of unknown size works in three shifts.

See Figure No. 3,

Appendix A.

50X1-HUM

4. The Yelov oleo plant, situated on the eastern side of the Burgas-Malko Turnovo highway, approximately 500 to 600 meters north of the Zavod Georgi Dimitrov plant and approximately 1,500 meters from the center of Burgas, manufactures oleo from sunflower seeds. The plant has one 1-story brick building, 40 by 100 meters, adjoining one 2-story brick building, 40 by 60 meters in size. The area covered by the factory is 120 by 200 meters and is enclosed by a brick wall one meter high which has one gate facing the highway. The labor force works in three shifts.

See Figure No. 1, Appendix B.

50X1-HUM

5. The Elprom electrical plant, situated on the western side of the Burgas-Grudovo highway, approximately two kilometers west of Burgas, manufactures various types of electrical products, including wire, switches, and electric light bulbs. This is a new plant, only partially completed, consisting of one many-windowed, 1-story, brick building, 150 by 400 meters in size, which was completed in 1950 and stands approximately 100 meters back from the highway. About 30 meters behind this building is a 1-story brick building, 100 to 120 by 200 meters, which is still under construction. The labor force works in three shifts. The area is not fenced in. See Figure No. 2, Appendix B.

6. The Yana Leskova textile mill, formerly Prezhda, located on the western side of the Burgas-Malko Turnovo highway, approximately four kilometers south of the center of Burgas, manufactures cotton and wool yard goods. This mill possesses two old 1-story brick buildings, 80 by 150 meters, and one new 2-story brick building, 100 by 200 meters. The mill is enclosed by a brick wall and has one entrance facing the highway. The labor force consists of approximately 600 women working three shifts.

See Figure No. 3, Appendix B.

50X1-HUM

Soviet Geological Research Unit

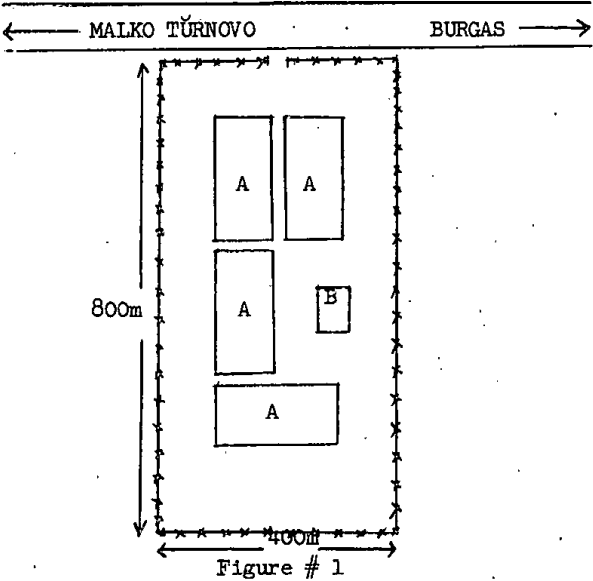

7. Since 1946 a Soviet Geological Research unit has been located at No. 2, Georgi Dimitrov Square. This unit is made up of approximately 50 Soviet engineers and related personnel under the command of a Soviet engineer by the name of Georgiev. The unit is engaged in a search for new mineral deposits in the vicinity of Burgas.

this unit discovered new copper and radium deposits five kilometers west of Gramatikovo in April 1951 and these new deposits are being quickly exploited.
